

Fire Marshal/Warden

Who should attend? Anyone with responsibility for assisting with emergency evacuation arrangements in their workplace, including fire co-ordinators, fire wardens/marshals, supervisors/managers with fire safety responsibilities or health and safety representatives from any type of organisation.

This 3 hour Fire Marshal Fire Safety training course fully meets the Fire Precautions Act (1971) and the Fire Precautions (Workplace) Regulations 1999 and covers new fire legislation in force from 1st October '06 - The Regulatory Reform (Fire Safety) Order. This course provides delegates with a theoretical and practical understanding of the typical functions of a fire warden or fire marshal within a workplace. Additionally this course will give delegates an understanding of how fires start and propagate within buildings and the tools to assist with the development and implementation of emergency evacuation arrangements. The course will involve a practical hands-on session with portable fire extinguishers (which we supply as part of this course).

Our fire safety trainer is a professionally qualified Fire Officer with a wealth of fire fighting and fire safety experience. This is invaluable when advising organisations on compliance issues, preparing staff for discussions with the local fire brigade and to add realism to all our fire safety courses.

Course Location: On-Site at your premises

Course Duration: 3 Hours (course date & course time to suit you)

No. of Delegates: 12 delegates max
