TRAINING & SERVICES LTD

Better People, Better Business®

Oxy-Acetylene/Propane Cutting Competency

All courses include a safety lecture relevant to the welding processes involved and delegates are advised on the welding safety pertinent to their individual workplace environment. The delegates are trained on the equipment used within their own works areas therefore familiarising them with all the functions, full capabilities and safe use of the equipment. This ensures your company has complied with legislation by carrying out formal training in line with the requirements of The Provision and Use of Work Equipment Regulations 1992.

This course is aimed at staff who are required to competently and safely operate oxy-acetylene or oxy-propane cutting and buring equipment.

Course Location: On-Site at your premises

Course Duration: 2 Full Days, (date & time to suit you e.g. 8.30am-3.30pm)

No. of Delegates: 10 delegates max

Topics covered:

This course introduces staff to the oxy fuel cutting process and will enable them to develop a range of skills, knowledge and practical techniques to produce good quality cuts on variety of materials. Delegates will also be aware of the correct procedures and safe working methods and practices in the safe handling and storage of equipment and gas cylinders.

- Health and Safety requirements
- Safe working practices
- Cylinder handling
- Hands-on exercises
- Pre-Inspection and Preparation of cutting equipment
- Cutting process for square edge and bevel cutting
- Correct shutdown procedures
- Safe storage of gas cylinders and cutting equipment
- Practical Testing and Exercises - specific to company requirements
- Oral Knowledge Questioning

Delegates Receive:

Certificate of Training, course notes and pen.
